

MD's New Year 2024 Message

Dear Colleague,

As the calendar year 2023 draws to a close, it is the time to reflect on the year gone by and look forward to the coming year with hope and optimism.

This year was a mixed bag of happy moments and challenging situations alike in terms of record throughput that was achieved in the last financial year 2022-23 and the challenges encountered during the Refinery Turnaround (RTA) including post RTA events respectively. I would like to express my deepest appreciation to all of you for demonstrating exemplary resilience in the face of the adversities experienced during the first quarter of the Financial Year.

Project activities have gathered momentum with receding monsoon; and we shall end the year 2023 on a high note as far as the progress of integrated Numaligarh Refinery Expansion Project is concerned. As expected, project works has its share of challenges which we all as a team have overcome. We can look with satisfaction on the work done in terms of ODC/OWC movement, progress of civil works and advance planning of residual works. Though there are grounds to cover, if the current progress is any indication, we should not have difficulty in completing the project as presently projected. Bio-Refinery is also likely to be commissioned during the current financial year.

With jobs in hand, it is but natural that available human resources are in stress shouldering additional responsibilities of not only running the plant with higher efficiency but also achieving progress of the project. The situation will continue for at least the next year and half. I am sure that like this year, we will work shoulder to shoulder as a team to march ahead and achieve the goals we have set out to accomplish.

Wishing you and your families all the best to all of you for the upcoming year.

With regards,

Bhaskar Jyoti Phukan
Managing Director
