Sub : Information under RTI Act, 2005

Dear Sir,

This has reference to your RTI application no. nil dated 16-11-2015 forwarded to us by MOP&NG vide letter ref. R-29011/29/2015-OR/36270 dated 09-12-2015 seeking information under RTI Act 2005. Please find below replies to the queries raised by you.

Q.1. When a customer authorizes a tank truck for bulk loading in any of the oil refineries' premises, under whose responsibility the authorized tank truck/crew enters the premises whether the oil company's or customer and to what extent?

Reply : It is the customers' responsibility to ensure responsible behavior of his authorized representative (TT crew) inside Company premises.

Q.2. In case of any wrong doing by this TT who will be held responsible and to what extent this responsibility is?

Reply : Customer will be held responsible.

Q.3. Are oil company refineries / terminals equipped with proper equipments and measures to stop theft etc. from their terminals by miscreants? What kind of measures and practices are being followed by oil companies so as to protect their material against theft? Is loading excess material (than what is billed) a common practice in the refineries / terminals of the oil companies.

Reply : State of the art supervision and surveillance systems are in place along with appropriate practices for detection and prevention of theft etc. Excess loading is not a practice.

Q.3.1. In case TT crew somehow manages to load excess material and manages to get it invoiced for lesser quantity, in so called modern and automated setups, what would the concerned Oil Company classify this as, theft, incidental excess loading, failure of their internal systems hence permissible losses or something else what in case the TT is released by the terminal as OK, ie. They could not find that TT has been billed for lesser quantity than loaded?

Reply : It will depend on the actual facts and circumstances, and treated as per the guidelines in practice and agreement of sale.

Q.4. In case customer has authorized a TT to be loaded at the oil company and the crew somehow manages to steal excess material, who shall be held responsible whether oil company or TT crew or the customer?

Reply : Customer and TT crew will be held responsible.

Q.4.1. In case the answer in Para no. 4 above is 'the TT crew', what process is followed by oil company to punish them and recover the losses?

Reply : It will be treated as per the guidelines in practice and agreement of sale.

Q.4.2. In case the answer in Para no. 4 above is 'the oil company', what procedure does the oil company follow to recover the losses as the oil company a PSU and answerable to the government?

Reply : Not applicable.

Q.4.3. In case the answer in Para no. 4 above is 'the customer', how does the oil company recovers the losses from the customer? Also please inform what is the scenario, if oil company discovers the theft after passage of long time where the said TT has been loaded and exited the refinery / terminal with proper invoices, say after a month the refinery / terminal notices that the theft has been done by a TT months ago than what is the procedure for them to recover losses?

Reply : It will be treated as per the guidelines in practice and agreement of sale.

Q.5. In case the answer for point no. 3.4 is "losses to be recovered from the customer", please explain how can it be justified because in oil industry any customer hires a TT for loading and once the load is discharged, weight is received transporter is free from any obligation towards customers as he has got proper acknowledgement for the quantity billed and discharged and for failure of Oil Company which has in fact loaded the TT and certified by way of Tax Invoice that this quantity has been loaded, can letter ask customer to make the losses goods? What was the role of customer in this whole episode/ he has simply authorized a TT to be loaded at terminal, under impression that no wrong can be done inside terminal premises as there are systems and checked., in case a TT has evaded these systems / checked it is clearly fault of the oil company and not customer, who has under confidence that Oil companies has all systems in place. If these kinds of theft are not routine this means Oil companies do not let this things happen and systems are so designed that it is not possible, if a stray incidence of such kind occurs then it means that there was some failure at oil companies end, they have either bypass certain systems or they have let their things so open that anybody can come and get under invoiced bills. If this is the case then certainly it is a serious matter as no oil company can let the public money get looted. Pl clarify.

Reply It will depend on the actual facts and circumstances, and treated as per the guidelines in practice and agreement of sale.

Contd...3

Date : 28th January 2016
Ref : NRL/CC/ RTI/Q-801

Page 3

Q.6. Also please inform as what is the duty and responsibility of the oil company if any TT can come and load whatever quantity and still manages to get it invoiced for lesser quantity? If this happens isn't it a case of total anarchy and mismanagement? Shall it not suggest that the oil company has no control on its loading facilities and the material is poorly guarded? Isn't it the duty of only oil company to protect its material against any theft or loss? Can a customer situated miles away be held responsible for any theft in the premises of oil company of the product which is in control of the oil company itself? In case the oil company detects /catches the theft while it occurred or while the TT has not left the company's premises, the indenter can certainly be summoned, but what if the oil company lets the TT go with theft invoicing it with X quantity and then after months debits the customer for the losses? Is it permissible to them whereas in this situation the oil company fails to discharge its duties properly and how can a certain possibility of the involvement of oil companies people be denied in such thefts? Please provide information about the procedure followed under such circumstances and the laws determining this procedure. And if Oil Companies have such systems in place which can after months predict that certain TT has got the excess material loaded, why these systems are not alarming at the time of invoicing? If these systems are deliberately muted so that TT with excess material can leave then this is a serious matter and all involved should be booked.

Reply : Procedures for system checks are in place at NRL to minimize and detect failure of internal control systems. For any theft/ malpractice during loading activities, the procedure followed will depend on the actual facts and circumstances, and treated as per the guidelines in practice and agreement of sale.

Q.7. Are any enquiries commissioned in these cases? Is lodging FIR is compulsory? If yes who is responsible for lodging this FIR for the theft committed in the premises of oil company whether the oil company, customer or any other third party? Against whom this FIR will be lodged?

Reply : Action is taken based on the actual facts and circumstances, and the applicable rules and procedures in place. Possibility of theft is minimized.

Q.8. How many cases of such thefts have been occurred in the last three years where the oil company discovered that theft has been committed in the way of taking material in excess to the invoiced quantity, specifically the cases where oil company discovered the theft after the TT had left the premises? What was the outcome of such cases?

Reply : Not Applicable.

Q.9. Also please let us know as who is responsible for preventing the thefts committed in the premises of oil company, whether the oil company or the customer? Also please explain as how a customer can prevent any theft oil companies premises?

Reply : NRL and all stakeholders including the customer is responsible for ensuring prevention of theft in the premises. Customer is to ensure responsible behavior of his authorized personnel inside company premises.

Q.10. Also please inform is it a routine practice at the oil companies that the thefts occur in the way of loading material by the TTs in excess to the billed quantity? If not, should it not be presumed that the oil companies have sufficient measures and equipments in effect to prevent the thefts and this (thefts) is not what oil companies have designed their terminals for.

Reply : Occurrence of theft is not a routine practice. Measures and systems are in place for prevention and detection of theft.

Contd....4

Date : 28th January 2016
Ref : NRL/CC/ RTI/Q-801

Page 4

Q.11. Is it ok on the part of Oil Company to suddenly debit the customer after TTs leave their terminal for reason that it has left with excess material? Can the fault of customer be established whereas he has no role other than placing an indent as per the standard practice setup by the oil company? Otherwise can the fault of oil company be established because it is the failure on the part of the oil company only that their system let the theft occur or their personnel have ignored few SOPs. Is there any other possibility for theft to occur in such a controlled environment?

Reply : It is treated as per the actual facts and circumstances, the guidelines in practice and agreement of sale. Customer representative is also responsible for crosschecking correctness of quantity loaded in the tank lorry. Possibility of theft at NRL is minimized by the existing systems, procedures and practices in place for prevention and detection.

Q.11.1. If answer to the Para no. 11 is yes – ignorance or equipment failure on part of oil company then why oil company should debits its customer? While they could lodge an FIR against the transporter / crew provided they have sufficient evidence against this TT, to make their losses good.

Reply : It is treated as per the actual facts and circumstances, the guidelines in practice and agreement of sale. Customer representative is also responsible for crosschecking correctness of quantity loaded in the tank lorry.

Q.11.2. In case reply to RTI query suggests that the customer only has to bear losses, please inform under what rule / law the oil company can impose penalty for ignorance on its own part to a customer who had no role except sending a hired TT to the oil company premises.

Reply : It is treated as per the actual facts and circumstances, the guidelines in practice and agreement of sale. Customer representative is also responsible for crosschecking correctness of quantity loaded in the tank lorry and for appropriate behavior inside the company premises.

Q.11.3. What action is taken on the personnel of oil company engaged in managing such terminals and on the other staff that has lacked in their duties to safe guard and follow SOPs.

Reply : Dealt with as per company rules.
